Week 5 ≡

Team Online Activity 2: Data Research & Visualization

It is time to choose the visuals that represent you as a team. All team members must participate in this activity.

Once all team members have shared their personal data sets and visualizations for your chosen team problem, the next step is for the team to **meet online** and collectively decide on three visualizations that they want to include as part of their Week #5 Milestone submission.

These selections will determine the focus of the team's efforts for the remainder of month 2. Each visualization chosen must strongly align with the team's problem statement and problem data set.

It is essential that each team member, including yourself, actively participates in the decision-making process and contributes their opinions and insights. The aim is to reach a consensus on the top 3 visualizations that align with the team's goals and priorities.

Consider the following steps to facilitate the decision-making process as a team:

Review and Discuss: Take the time to carefully review and discuss each team member's data sets and visualizations. Share your thoughts and observations regarding the strengths, relevance, and potential of each visualization.

(/)

Remember your visualizations must tell a compelling story.

Facilitate Discussion: Encourage open and constructive dialogue among team members. Give each team member an opportunity to express their preferences and provide reasoning for their choices. Listen actively and respect diverse viewpoints.

Seek Consensus: Aim to find common ground and identify the visualizations that receive the most support from the team. Look for areas of agreement and work towards a shared understanding of the top 3 visualizations.

Finalize Selections: Once the team has reached a consensus, go back to the Team Google Doc from the first meeting and document the decisions regarding the 3 chosen visualizations and data sets.

For effective teamwork, do your best to ensure that the majority of team members are in agreement with the selections.

Decide on which visualizations to submit as part of Week #5 Milestone. Of the 3 top visualizations that the team has chosen, discuss and agree on 2 that each member of the team will submit as part of Week #5 Milestone.

Happy Choosing!
